Overview

I'm a React developer with skills in business and design. During my time freelancing I have gained skills in Photoshop and Figma, allowing me to develop and design websites with clear purpose and messaging. I have both front end (React, HTML, CSS) and back end skills, using MongoDB, Nodejs and Express to create APIs.

Most of the skills I know now are self taught, displaying my determination and commitment to learning. With each concept and technology I understand, the more passionate about this field of work I become.

Soft Skills

Technical
I'm a quick learner and always focused on the task at hand.

I strive to always implement best practices and streamline/automate as much as I can.

Personal
I'm a supportive, hardworking and driven individual who loves working in an environment with others as passionate as me. As such, I tend to motivate people with my hard work.

I'm endlessly enthusiastic about development, having taught myself HTML, CSS, React and other technologies. I've made it my mission

Myself / Web Freelancer
August 2022 - Present

React/Redux, CSS, Nodejs, Express, Axios, MongoDB/Mongoose

- Designing and developing websites for music producers, small businesses and friends.
- Hosted and managed websites via Vercel and Bluehost.
- Worked with Nodejs to make RESTful APIs for websites then used Axios on the front end to call them.
- Interacting with MongoDB using data schemas (mongoose)

StoneSpiral Ltd / Front End Developer
January 2022 - July 2022

Photoshop, HTML, CSS, JS, Github, Wordpress

- Designed and developed Javascript based websites and web apps.
- Worked with Wordpress as a CMS to deliver content to the front end.
- Manipulated images for web pages to adhere with client requirements in Photoshop.
- Adhered to the team's best practices.

Fulham Enterprise Studios / Level 3 National Diploma in Information Technology
January 2018 - July 2021, London

- Learned about Digital marketing and the impact of business online.
- Learned about simple HTML5 and CSS3.
- Learnt about working with DBMS (database management systems)
- Graduated with a Double Merit.

Udemy / Modern React and Redux
July 2022, London

- Learned the fundamentals of building dynamic web applications with React.
- Really deepened my knowledge about React state and context.
- Understanding the use of Redux in more large scale applications.

Fulham Enterprise Studios / Level 3 National Certificate in Engineering
January 2018 - July 2021, London

to become a developer and to this end I'm extremely driven.
